DIRECTORATE OF COLLECTION

(U) Organization and Functions

(Uncl) There were no significant changes in organization and functions in this Directorate during this period.

(U) Domestic Collection

During the period covered by this report, a total of seven (7) exchanges with the USSR were implemented, only one of which was USAF sponsored. The remaining six exchanges included such areas as Economics, Cement, Petroleum, Inland Waterways, Railroads and Polymers. Of particular USAF interest was the Civil Air Transport Exchange which was introduced and closely monitored by personnel from this Directorate. Of a total of 27 conferences during the period, only four were held in Moscow.

The Human Resources Branch, Collection Division, Directorate of Collection, initiated the preparation and publication of a series of pamphlets which summarized, on a SECRET level, all information available within AFCIN on [redacted]. The purpose of these publications is to provide adequate and detailed guidance to field collectors as a means of improving intelligence collection against these important areas. Two pamphlets,
have been prepared. Originally, the PAIR-1 Site List was reviewed and a list of fifteen was extracted to provide a starting point for the preparation of these pamphlets. It is intended that after this group is exhausted, similar publications will be prepared on all Priority Air Intelligence Requirements (PAIR) sites. Since this matter is more directly concerned with actual collections rather than policy, the project has been transferred to the 1127th Field Activities Group for completion.

(U) The Defector Program
(U) **Operation CLICK BOX**

Within the AFCIN Space Utilization Program, Operation CLICK BOX (to obtain photography of inflight Soviet vehicles using the 240" Boston University Telescope camera, a ground based mobile camera) was tested under controlled conditions at China Lake, California. The purpose of this test was to evaluate the actual capability of the camera and to obtain sufficient accurate data that could be used as a basis for a decision to improve our photographic sensor capability.
(U) **Aerial Photo Requirements**

Basic planning is continuing for integrating Air Force reconnaissance requirements into the Aerospace Intelligence File at the Air Force Intelligence Center (AFIC). A tentative date for integration has been identified by AFIC as April 1961. Conversion to tape will make reconnaissance requirements compatible with computer utilization for current systems.

(U) **Revision of PAIR-1 and CAIR-1**

The first revision of Priority Air Intelligence Requirement (PAIR-1) was disseminated late in December. A significant addition was a map reflecting the locations of the [Redacted].
the AFCIN-assigned site case number. Revision of Current Air Intelligence Requirements (CAIR) on the USSR, European Satellites and Communist China (CAIR-1) was completed and forwarded for printing in November and was disseminated in December. The new edition has expanded the specific current requirements for [REDACTED] and also reflects an increase in contributions from AFCIN producers.

(U) CAIR-1 Supplement on Communist China

(U) Control Procedures for Short Term Air Intelligence Requirements (STAIRs)

(Uncl) Procedures for internal control and recording of STAIRs were revised and a system instituted which provides for incorporation of records into an electronic accounting machine system. Initial experiments were begun
in July 1960 and completed in September 1960. The new procedures have proven efficient and economical.

(U) Liaison Branch, International Liaison Division

(Uncl) During the period 1 July - 31 December 1960 the Liaison Branch was responsible for the following tours:

**State Department Tours:** (in which AF had responsibility)

Crown Prince of Morocco Moulay Hassan
